SUMMARY

Full-stack engineer and startup CTO with nearly 10 years of experience shipping web and mobile products end to end, from architecture and database design to hosting. Co-founder and CTO of AION sense, a 6-person longevity health-tech startup heading into its pilot. Co-founded two companies and built several products largely on my own.

EXPERIENCE

CTO & Co-Founder

Jul 2025 – Present

AION sense Kft.

- Building a longevity app that turns data from our smart wristband into personalised health insights.
- Own the full technical stack: mobile app, admin panel, B2B dashboard, website, database and hosting.
- Run self-hosted AI models that generate insights and recommendations from users' health data.
- Launched a closed beta with ~50 testers as part of a 6-person team; now preparing the first pilot.

Tech: React Native, TypeScript, Supabase (Auth, DB, backend), Cloudflare, self-hosted AI models

Full-Stack Developer

Mar 2025 – Present

Bnbmates (bbmates.com) · Freelance

- Building the direct booking website with online payments and an admin interface for properties and bookings for a short-term rental company operating in Bali, Budapest and Dubai.

Full-Stack Developer

May 2018 – Aug 2026

InMedia Digital AG · previously Frontend Developer

- Developed and maintained the company website, admin dashboard and several white-label sites.
- Built a custom video player, a complex admin interface and a landing page generator.
- Maintained the legacy codebase (Yii/PHP, AngularJS, jQuery) alongside the modern stack.

Tech: Next.js, Nuxt.js, Vue.js, Node.js / Express

Frontend Developer

Mar 2021 – Jan 2022

Gravity Research & Development Zrt. · Remote contractor

- Built the admin dashboard for a webshop product recommendation engine; optimised and maintained legacy frontend code.

Full-Stack Developer

Mar 2019 – Apr 2020

Assist-Intelligence Kft. (Peaqlplus) · Remote contractor

- Designed and built ~95% of a user and permission management system for hotel staff from the ground up.

Tech: Laravel (PHP), Vue.js, MySQL

Co-Founder & Full-Stack Developer

Aug 2017 – May 2018

Cloudent Kft.

- Built a dental practice management system from scratch in 9 months, owning backend, frontend, database and hosting.

Tech: Laravel, Vue.js, AngularJS, jQuery, MySQL, AWS

Software Developer

2016 – 2017

graphIT Kft. · Ozeki Informatics Ltd.

- graphIT (2017): built a C# data interface for a production scheduling system; frontend work on a documentation site.
- Ozeki (2016): developed the company's .NET-based framework in C#; optimised the Ozeki Dialer frontend for mobile.

SKILLS

Languages: TypeScript, JavaScript, PHP, C#, SQL

Frontend & mobile: React, React Native, Next.js, Vue.js, Nuxt.js

Backend & data: Node.js, Express, Laravel, Supabase, PostgreSQL, MySQL

Cloud & DevOps: Cloudflare, AWS, Docker, Linux, Nginx

AI & tools: LLM integration, self-hosted AI models, Claude, Stripe, Figma

EDUCATION

Business Informatics — University of Debrecen

Thesis: Application development in the .NET environment

Java tutoring: tutored 6 university students through a semester-long programming course; all passed on their first attempt.

LANGUAGES

Hungarian: native · **English:** upper-intermediate (B2)
